OnePassport® | Employers

Have Passport. Can Work.

ONE PASSPORT

OnePassport® provides a universal skills and compliance passport for workers in regulated industries.

What is OnePassport®?

OnePassport® is a patent-pending, cloud based system for managing compliance and skills records that allows your workers to manage their own information so you don't need to.

OnePassport® | Profile allows individuals to collect and store their own employment, qualifications, skills and compliance information. It allows them to have this information independently verified, and share it with a variety of relevant organisations.

OnePassport® | Comply is a powerful set of tools that helps you save time and money, and reduce risk, in workforce compliance management.

OnePassport® | HR provides a simple suite of HR capabilities to extend OnePassport® | Comply.

How will OnePassport® help my organisation?

- Manage compliance records including skills, qualifications, compliance, education and training without expensive and time consuming manual processes.

- Automate common actions such as updating workforce records, uploading training records, and receiving alerts for personal screening checks.

- Run real time compliance and training reports at the click of a button.

- Streamline the recruitment and onboarding process through standardised applicant processes and importing of data for successful candidates.

What's included in **OnePassport®?**

Digital compliance platform

Unique compliance management system designed from the ground up for regulated industries.

Powerful person centred workforce management

A rich interface for each worker to manage their own compliance and HR records with independent verification where required.

Metrics & Reports

Information on the system can be analysed using pre-built and customised sets of graphs, charts and diagrams designed for easy interpretation and sharing. Timely access to this information allows line of sight visibility to all key stakeholders, driving better operational and management decisions.

Automated background checks

OnePassport® connects to external third parties for background screening including police checks, employment history, qualification verification, and others. OnePassport® includes alerts to proactively manage expirations and renewals, and automatic document uploads.

Marketplace

There are a variety of Add-Ons available including vehicle register, immunisation register and new ones are being added on a regular basis.

ONE PASSPORT
