Reynard's Premier detergent & disinfectant wipes. Stay one wipe ahead of germs.

Clean and disinfect equipment
and surfaces simply and effectively
whilst saving time and money.

Reynard's Premier detergent & disinfectant wipe is a proven, single step solution to cleaning and disinfecting surfaces equipment. Our new gentle formula is optimised for use in both clinical and non-clinical settings on surfaces and equipment whilst proven to kill at least 99.999% of pathogens and is tested and ARTG listed for use against SARS CoV 1&2. AUSTL337692.

Reynard is reassurance.

Reynard's Premier detergent & disinfectant wipes.

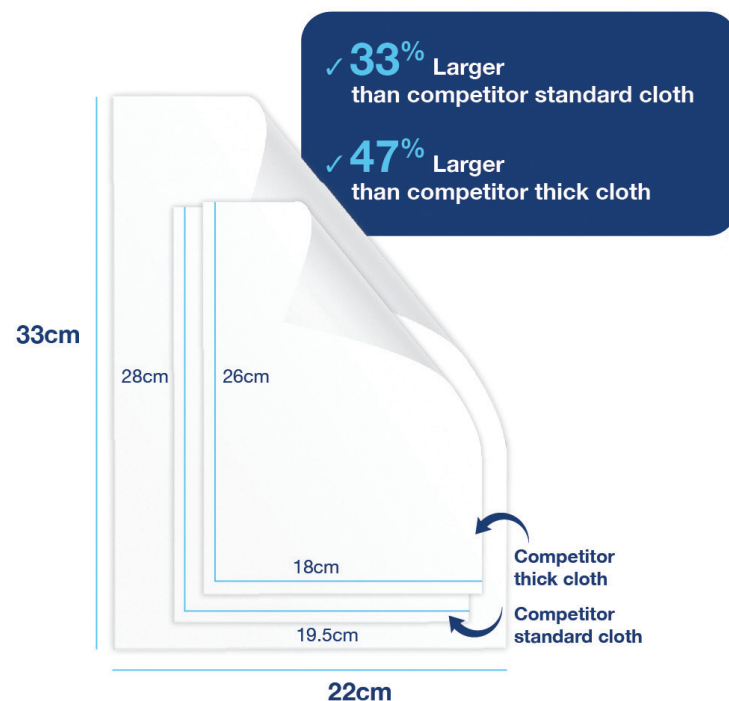

The cloth that is a cut above.

Our Premier wipes are gentler on materials and have a newly developed soft apertured polyester substrate that boasts superior formulation retention, and extremely good traction to pick up dirt, bacteria and other pathogens. Most other surface disinfecting products are made from thinner, thermal bond polyester substrates that push the dirt or bacteria around, rather than pick it up.

This superior cloth provides significantly higher levels of performance, especially if you are using a one step cleaning and disinfecting protocol. Combined with a softer formulation that will not dry or damage surfaces and is safe to use on surfaces and equipment, Reynard Premier disinfectant wipes provide a safe, easy to use and cost-effective infection control solution.

The All-in-one wipe that has best in class performance for cleaning and disinfection.

Reynard Premier Disinfectant Wipe

Our winning formula.

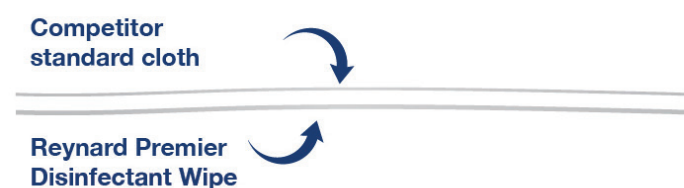

Biodegradable, non-ionic surfactant with excellent non-streaking and superior wetting properties to provide the wipe with an effective cleaning action and enable the liquid to effectively wet out surfaces.

It incorporates a Fungicide and Chelating agent to enhance the biocidal activity of the wipe. Our proprietary active disinfecting formula that contains three active biocidal agents for maximum effectiveness and adaptability.

While germs aren't safe, your equipment is.

Reynard's Premier detergent & disinfectant wipes were developed with key clinical equipment providers to ensure an unparalleled range of device and material compatibility. The wipes will not dry or damage surfaces, and are safe to use on plastics, polymers, aluminium, stainless steel, powder-coated surfaces, vinyl and leather. Tested and safe to use on and around equipment. The formula was developed to ensure the wipes would clean hard surfaces and equipment without causing harm.

✓ Reynard Premier Disinfectant Wipe is a **28%** thicker cloth

Kills 99.999% of pathogens after just 60 seconds, bacteria, fungi, viruses including SARS-CoV-1&2 and MERS-CoV.

Reynard Health Supplies.

Reynard Health Supplies was established in New Zealand in 1999 and today is the number one supplier of surface cleaning & disinfection wipes, specialist patient care wipes and IV Therapy products to hospitals in New Zealand and Australia.

Reynard Health Supplies is owned by a dedicated group of Australian and New Zealand shareholders who are all actively and directly involved in the day to day operation and development of the business worldwide.

Reynard is reassurance.

At Reynard, we strive to provide products and support services that provide you with the reassurance you need to be able to focus on optimum patient outcomes. This reassurance stems from:

- Quality & Range - a wide range of quality products to suit every need;
- Cost savings - Cost effective solutions;
- Reliability - A reliable, proven supply chain;
- Support - Technical, educational and compliance support services;
- Research & Development - Ongoing product development; and
- Flexibility - The willingness to design new products and supply chain options.

Reynard is reassurance.
